

Our Program

At Kid's World Childcare we believe that children learn through play.

Through our play-based curriculum children learn and develop:

- ◆ Pro-social skills
- ◆ Fine and Gross motors skills
- ◆ Problem solving skills
- ◆ Logical thinking skills
- ◆ Language development

Since most children are sequential learners, our environments are designed to allow children to scaffold their

newly acquired skills as they progress from one level to the next .

Our curriculum and child

interactions are based on developmentally appropriate practices.
